***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 7<sup>2,74</sup>, drawn to a process of establishing oriented nanotubes, classified in class 264, subclass 29.1.
- II. Claims 9-45, drawn to a method of making semiconductor device, classified in class 438, subclass 105.
- III. Claims 46-48 and 56-71, drawn to a system for constructing a structure, classified in class 425, subclass 110.
- IV. Claims 49-54, drawn to parallel nanotubes, classified in class 428, subclass 299.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are only related as being pertinent to nanotubes, but they are different and distinct from one another, there is no correspondence between the claims of any of the groups.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, and separate examination would be required, restriction for examination purpose as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2812
